1 Design & Test Plan

The following table gives due dates for each of the tasks, worked in parallel. If they are not tested together, then they are tested against the given behavioural blocks. Optimisations refers to any modifications before the final hand-in; if they are described at all, it is in the individual student statement, and otherwise refers to general changes intended to increase system performance. Also, each date requires both pre- and post-synthesis to be working.

Table 1: Design And Test Plan

Version	Date Due	DB Task	RCB Task	Tested Together
v0	1/3	Move Commands	Move Commands	No
v1	10/3	Draw Commands	Write to Cache	No
v2	15/3	Clear Commands	Support clearscreen	No
v3	17/3	N/A	RAM Timings	Yes
v4	21/3	Optimisations	Optimisations	Yes
